

Consultation response to the draft EIA and VSB statement regarding the Nalunaq gold mine project

On 5 January 2024, the Mineral Resources Authority sent material regarding draft EIA and VSB statement regarding the Nalunaq gold mine project, with a consultation deadline of 1 March 2024.

Nukissiorfiit has the following general comments on the hearing:

- The affected area is outside Nukissiorfiit's supply area, which is why it is assessed that the project will not affect operations in the surrounding settlements.
- Nukissiorfiit perceives it as positive that a hydropower plant will be constructed and will follow the studies for this with great interest.
