Sendt: 06-06-2024 00:20

Please excuse me that this mail is coming late,

Please see the mail attached below, that my pc was frozen (several times during the evening)

Thank you very much for the extensive process dialogue with the industry.

I have two wishes:

The law allows a lot of details to be determined by the government (including organizations working under it), at a later date. Please ensure that you have guardrails that will carry on the initial goals of the law, which I agree to very much. Politicians and administrators change, and the law lives on for many more years. Please structure the law so that it is not possible to change the important goals that we have now.

A good definition of "local" is necessary. Is a foreigner who just moved to Greenland because of business chances, truly "local"? How do you assess a person who has lived in Greenland for a long time – either Greenlander or foreigner by nationality – and speaks the language, has learned the culture, has Greenlandic partners, but needs to move away from Greenland for some private reason? There was a lot of talk about money, but I believe that respect and understanding towards our culture and identity is much more important. There is need to carry on our Greenlandic identity, and also learn what is good for us from around the globe. What do we need to learn, and what kind of global partnership is truly beneficial for us in the long term? These are not easy questions, of course, and there will be different opinions, but I trust our present leadership at the government, to bring long term empowerment to our people. Please form the law that your present goat will be carried on far into the future.

Qujanaq, I look forward to working together with you and colleagues in the industry towards a good future.

Dear Salik

I am trying to send a response to the hearing but my pc is frozen.

I am writing this from my mobile before the day changes, and will send another email as soon as I can.

Inussiarnersumik inuulluaqqusillunga / With best regards
