

## Defence Command Denmark

21 May 2017

To Department for Erhverv, Arbejdsmarked, handel og Energi

### Regarding the pre-hearing of the Pituffik platinum project

Search and rescue as well as marine environment surveillance and combat of pollution is the responsibility of the (Forsvaret). Arctic Command (AKO) has dealt with the two scoping reports that are in a hearing process.

It is noted that assessments of shipping and risk assessments are part of the ToR, which is suggested to be maintained.

Finally Arctic Command would like to remark that Arctic Command should be included in the list of stakeholder under authorities

On behalf of the Defence Command Denmark, AKO would like to receive future Terms of References and project plans in hearing among authorities in a similar way as for example the Danish Maritime Authority (Søfartsstyrelsen).

With kind regards

Michael Løbnitz Bager

Orlogskaptajn

Chef for Planlægning og Udvikling (J5)
