Hearing respond to the scoping for the SIA and EIA for the titaniumproject at Pituffik

SIK welcomes the opportunity to provide a hearings response to the present prehearing.

SIK notes from the Terms of Reference for the SIA that at this stage it is not clear how many workers will be required for the coming project. SIK requests that this is made clear during the preparation of the SIA report. In addition, SIK would like to ask for clarification of the ration of the needed skilled and unskilled workers.

SIK notes with approval that it is clear from the draft (ToR) that stakeholder interviews will take place with representatives from the municipality and SIK regarding the possibility to attract workers from the Qaanaaq area and (to discuss) potential issues regarding working conditions and working environment.

SIK has no further comments to the pre-hearing.

Best regards

Bjarne Petersen
