

Dear Sir/Madam

I wish to object to the SIA and EIA reports for the rare earth elements project at Kuannersuit (Kvanefjeldet) as there is no mention of thorium extraction, waste and disposal.

Without details of thorium waste disposal these SIA and EIA documents are not fit for purpose.

In the current Covid pandemic I cannot travel to a public meeting – as a minimum we need an online consultation portal in order that comments and objections can be collected and acknowledged.

Regards

Elaine Walters
